

SHILPA

Sr. Business Analyst – Healthcare

gopidishilpa11@gmail.com | +1 (614)-683-9466

PROFESSIONAL SUMMARY

Results-driven Business Analyst with 10+ years of experience in translating business challenges into actionable requirements for technical solutions, process improvement, and automation initiatives. Strong expertise in gathering, analyzing, and documenting business and functional requirements including BRDs, FRDs, PDDs, and SDDs for complex systems. Proven ability to perform AS-IS and TO-BE analysis, gap analysis, and process re-engineering to improve operational efficiency. Skilled in creating user stories, use cases, workflows, and process flow diagrams using tools like Visio and JIRA within Agile/Scrum environments, participating in sprint planning, backlog grooming, and daily stand-ups. Strong experience in data analysis, data mapping, and validation using SQL, Excel, and reporting tools. Expertise in supporting UAT, test planning, defect tracking, and stakeholder sign-offs. Experience in integrating systems using REST/SOAP APIs, JSON, and XML for seamless data exchange and microservices integration. Proven track record of collaborating with cross-functional technical teams, SMEs, and stakeholders to deliver scalable solutions and drive digital transformation. Adept at identifying automation opportunities and translating requirements for advanced technical initiatives. Strong communication, presentation, and stakeholder management skills, effectively bridging business objectives with technical teams to lead project planning and execution. Experienced in risk identification, issue resolution, and continuous process improvement, committed to delivering high-quality solutions.

TECHNICAL SKILLS

Business Analysis: Requirements Gathering & Documentation (BRD, FRD, PDD, SDD), User Stories, Use Cases, Process Mapping (AS-IS/TO-BE), Gap Analysis, UAT, Data Analysis & Mapping, Stakeholder Management, Project Planning. Tools: MS Visio, Excel, SharePoint, JIRA (Agile), Confluence. Databases: SQL Server, Oracle, MySQL. Technologies: REST/SOAP APIs, JSON/XML, Microservices Architecture. Methodologies: Agile (Scrum), Waterfall.

WORK EXPERIENCE

Sr. Business Analyst – Healthcare

State of NY (DHHS) – NY, USA

June 2024- Till Date

Responsibilities:

- Gather and analyze business requirements for complex automation and digital transformation initiatives.
- Conduct stakeholder meetings and workshops to understand business requirements and operational workflows for technical solutions.

- Create BRDs, FRDs, and Solution Design Documents (SDDs) for complex technical systems and integrations.
- Perform AS-IS and TO-BE analysis to identify process improvement opportunities for technical implementations.
- Collaborate with technical teams to translate business requirements into functional specifications.
- Work on **data mapping, validation, and integration** across healthcare systems and APIs.
- Ensure compliance with **HIPAA, SOX, and PCI regulations** in all process implementations.
- Support **UAT testing**, defect tracking, and validation of business requirements
- Coordinate with offshore teams to ensure timely delivery of solutions
- Develop dashboards and reports for tracking KPIs and operational metrics.
- Participate in Agile ceremonies including sprint planning and backlog refinement.
- Coordinate with QA teams to develop test plans, test cases, and support UAT activities.
- Track defects, manage issue logs, and ensure timely resolution of bugs during testing phases.
- Analyze large datasets using SQL and Excel to derive insights and support decision-making.
- Identify automation opportunities to improve operational efficiency and reduce manual intervention.
- Support system integration efforts involving REST/SOAP APIs, JSON, and XML data formats.
- Facilitate communication between business stakeholders and technical teams to ensure alignment.
- Prepare reports, dashboards, and documentation for leadership and stakeholders.
- Monitor project progress and provide regular status updates to stakeholders and management.
- Assist in change management processes and ensure smooth implementation of new solutions.
- Continuously evaluate and improve business processes to enhance performance and scalability.

Sr. Business Analyst – Healthcare
 CVS Health – Woonsocket, Rhode Island, USA
 Apr 2021 – Jan 2024

Responsibilities:

- Worked on complex operational processes and system workflows, collaborating for solution development.
- Collaborated with SMEs to document PDDs, BRDs, and process workflows for new technical solutions.
- Identified automation opportunities to improve efficiency and reduce manual errors in business processes.
- Conducted gap analysis and feasibility studies for process improvements and system enhancements.
- Supported integration with **OCR and document processing systems** for claims automation.
- Created **test plans, test cases, and UAT documentation**.
- Gathered and documented requirements for **loan and financial healthcare-related workflows**.
- Conducted stakeholder interviews and created **functional requirement documents**.
- Performed **data analysis and reporting** using SQL and Excel.
- Developed **process maps and workflow diagrams** using Visio.
- Supported **UAT cycles and defect resolution**.
- Ensured data accuracy and integrity across systems.
- Ensured compliance with **HIPAA guidelines and data privacy standards**.
- Worked closely with QA and Dev teams for successful project delivery.

- Mentored junior analysts and contributed to process standardization.

Business Analyst / Process Analyst

Cigna, India | Nov 2017 – Mar 2021

Responsibilities:

- Worked on **health insurance processes including claims, eligibility, and billing systems.**
- Conducted **requirement gathering sessions** and documented workflows.
- Created **process maps, business rules, and functional specifications.**
- Supported automation initiatives to streamline healthcare operations.
- Ensured compliance with **HIPAA and regulatory standards.**
- Coordinated with cross-functional teams for implementation and support.

Junior Business Analyst / Developer

Accenture, India | Aug 2015 – Nov 2017

Responsibilities:

- Assisted in requirement gathering and documentation for enterprise applications.
- Created **user stories, workflows, and functional documents.**
- Supported development and testing teams in delivering solutions.
- Participated in Agile ceremonies and project planning.

EDUCATION

Bachelor's Degree in Computer Science

Sri Indu Institute of Engineering and Technology (JNTUH) – 2015
