

SHILPA

Sr. Business Analyst – Healthcare
gopidishilpa11@gmail.com | +1 (614)-683-9466

PROFESSIONAL SUMMARY

Accomplished Sr. Healthcare Business Analyst with 10+ years of experience driving business analysis and process optimization across payer and provider healthcare landscapes. Strong expertise in eliciting, analyzing, and authoring comprehensive BRDs, FRDs, and technical specifications. Deep domain knowledge of claims adjudication, member enrollment, billing processes, and EHR/EMR system integrations. Hands-on experience ensuring HIPAA compliance and secure PHI data handling across integrated clinical and billing systems. Proven ability to conduct AS-IS and TO-BE gap analyses to streamline healthcare workflows and operational efficiency. Expert in creating detailed Agile user stories, acceptance criteria, use cases, and complex process flow diagrams in JIRA and Visio. Extensive background in Agile/Scrum environments, facilitating sprint planning, backlog grooming, and cross-functional team collaborations. Proficient in data analysis, data mapping, and validation utilizing SQL, Excel, and advanced reporting tools. Demonstrated expertise leading end-to-end UAT, defining test plans, tracking defects, and securing stakeholder sign-offs. Skilled in system integrations using REST/SOAP APIs, JSON, and XML to facilitate seamless electronic health record exchange. Track record of collaborating with clinical SMEs, technical architectures, and business leaders to deliver scalable, compliant solutions. Comprehensive experience managing EHR/EMR platform integrations and document workflows. Adept at identifying process improvement opportunities to modernise and automate manual healthcare operations. Exceptional communication and stakeholder management skills with a strong ability to bridge the gap between business and technology. Proven capability in proactive risk mitigation, issues resolution, and strategic clinical workflow design. Self-driven professional committed to delivering high-quality, high-impact clinical and operational systems. Dedicated to executing projects aligned with core business objectives and regulatory healthcare compliance.

TECHNICAL SKILLS

Healthcare Domain: Claims Adjudication, Member Enrollment, Billing Processes, EHR/EMR Integrations, HIPAA Compliance
BA Skills: BRD, FRD, User Stories, Gap Analysis, UAT Execution, Data Mapping, Process Workflows
Tools: MS Visio, Excel, JIRA (Agile), Confluence, SharePoint
Databases: SQL Server, Oracle, MySQL
Technologies: REST/SOAP APIs, JSON/XML
Methodologies: Agile/Scrum, Waterfall

WORK EXPERIENCE

Sr. Business Analyst – Healthcare
State of NY (DHHS) – NY, USA
June 2024- Till Date

Responsibilities:

- Gather and analyze complex business requirements for healthcare systems, focusing on EHR/EMR integrations and digital transformation initiatives.
- Conduct stakeholder meetings and workshops to dissect claims adjudication, member enrollment, billing processes, and clinical workflows.
- Create detailed BRDs, FRDs, and Agile User Stories to guide the technical implementation of healthcare and EHR systems.
- Perform rigorous AS-IS and TO-BE analysis to optimize billing, enrollment, and EHR/EMR integration processes while facilitating UAT.
- Collaborate with technical teams to translate business requirements into functional specifications.
- Work on **data mapping, validation, and integration** across healthcare systems and APIs.
- Ensure compliance with **HIPAA, SOX, and PCI regulations** in all process implementations.
- Support **UAT testing**, defect tracking, and validation of business requirements
- Coordinate with offshore teams to ensure timely delivery of solutions
- Develop dashboards and reports for tracking KPIs and operational metrics.
- Participate in Agile ceremonies including sprint planning and backlog refinement.
- Coordinate with QA teams to develop test plans, test cases, and support UAT activities.
- Track defects, manage issue logs, and ensure timely resolution of bugs during testing phases.
- Analyze large datasets using SQL and Excel to derive insights and support decision-making.
- Identify automation opportunities to improve operational efficiency and reduce manual intervention.
- Support system integration efforts involving REST/SOAP APIs, JSON, and XML data formats.
- Facilitate communication between business stakeholders and technical teams to ensure alignment.
- Prepare reports, dashboards, and documentation for leadership and stakeholders.
- Monitor project progress and provide regular status updates to stakeholders and management.
- Assist in change management processes and ensure smooth implementation of new solutions.
- Continuously evaluate and improve business processes to enhance performance and scalability.

Sr. Business Analyst – Healthcare

CVS Health – Woonsocket, Rhode Island, USA

Apr 2021 – Jan 2024

Responsibilities:

- Led business analysis for payer-side systems, optimizing claims adjudication, billing, and member enrollment processes.
- Collaborated with healthcare SMEs to draft comprehensive BRDs, FRDs, and detailed User Stories for cross-functional teams.
- Identified system integration opportunities to streamline EHR/EMR workflows and reduce manual entry errors in claims billing.
- Conducted gap analysis, feasibility studies, and user acceptance testing (UAT) for healthcare claim and billing system enhancements.
- Supported integration with **OCR and document processing systems** for claims automation.
- Created **test plans, test cases, and UAT documentation**.
- Gathered and documented requirements for **loan and financial healthcare-related workflows**.

- Conducted stakeholder interviews and created **functional requirement documents**.
 - Performed **data analysis and reporting** using SQL and Excel.
 - Developed **process maps and workflow diagrams** using Visio.
 - Supported **UAT cycles and defect resolution**.
 - Ensured data accuracy and integrity across systems.
 - Ensured compliance with **HIPAA guidelines and data privacy standards**.
 - Worked closely with QA and Dev teams for successful project delivery.
 - Mentored junior analysts and contributed to process standardization.
-

Business Analyst / Process Analyst

Cigna, India | Nov 2017 – Mar 2021

Responsibilities:

- Worked on **health insurance processes including claims, eligibility, and billing systems**.
 - Conducted **requirement gathering sessions** and documented workflows.
 - Created **process maps, business rules, and functional specifications**.
 - Supported automation initiatives to streamline healthcare operations.
 - Ensured compliance with **HIPAA and regulatory standards**.
 - Coordinated with cross-functional teams for implementation and support.
-

Junior Business Analyst / Developer

Accenture, India | Aug 2015 – Nov 2017

Responsibilities:

- Assisted in requirement gathering and documentation for enterprise applications.
 - Created **user stories, workflows, and functional documents**.
